PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in SQL, Python, Power BI, and Excel, specializing in data modeling, ETL processes, statistical analysis, KPI development, and dashboard automation. Proven track record of improving reporting efficiency by 30%, increasing campaign performance by 17%, and enabling data-driven decision-making through structured validation frameworks. Strong foundation in hypothesis testing, exploratory data analysis (EDA), and stakeholder-focused business intelligence reporting.

CORE COMPETENCIES

Data Modeling — ETL & Data Transformation — SQL Optimization — Statistical Analysis — Hypothesis Testing — A/B Testing — KPI Development — Dashboard Automation — Data Validation — Business Intelligence — Data Visualization — Root Cause Analysis — Trend Analysis — Stakeholder Reporting

TECHNICAL SKILLS

Programming: SQL (Joins, CTEs, Window Functions, Subqueries), Python (Pandas, NumPy, Matplotlib)

BI Tools: Power BI (DAX, Power Query, Data Modeling, RLS), Tableau

Analytics: EDA, Data Cleaning, Feature Engineering, Correlation Analysis, Regression Fundamentals

Tools: Excel (Advanced Formulas, Pivot Tables, Power Query), Google Sheets

Database Exposure: MySQL

Techniques: A/B Testing, Forecasting Basics, Performance Analytics, Data Warehousing Concepts

PROFESSIONAL EXPERIENCE

Junior Data Analyst

July 2025 – January 2026

Analytics Benchmark Trainings, Hyderabad

- Designed and implemented ETL workflows using SQL and Python for structured data transformation and validation.
- Built 10+ interactive Power BI dashboards with optimized data models and DAX measures, reducing reporting turnaround time by 20–30%.
- Automated recurring Excel-based reports using Python scripts, saving 5–8 hours weekly.
- Wrote optimized SQL queries improving data extraction efficiency and aggregation performance.
- Conducted A/B testing campaigns with statistical validation, improving email open rates by 17%.
- Established data validation frameworks ensuring 95%+ reporting accuracy.
- Delivered stakeholder-ready KPI reports supporting operational and marketing decisions.

Technical Support Professional

April 2024 – July 2025

Foundever India Pvt Ltd, Hyderabad

- Applied analytical troubleshooting and root cause analysis to resolve recurring technical issues.
- Identified performance trends from service logs to improve resolution efficiency.
- Documented incident patterns contributing to workflow optimization and performance tracking.
- Collaborated cross-functionally to enhance operational effectiveness.

PROJECTS

Supply Chain Analytics Dashboard – Power BI

- Developed an end-to-end BI solution monitoring inventory turnover, vendor efficiency, stock-out risk, and order fulfillment KPIs.
- Built relational data models and implemented DAX measures for dynamic KPI calculations.
- Applied drill-through analysis enabling real-time performance tracking.
- Identified underperforming vendor segments impacting fulfillment cycles.

Loan Default Risk Analysis – Python

- Conducted exploratory data analysis to identify key drivers of customer default risk.
- Performed missing value treatment, outlier detection, and feature scaling.
- Applied correlation and regression-based techniques to identify high-risk segments.
- Generated visualizations uncovering patterns supporting risk mitigation strategies.

CERTIFICATIONS

Microsoft Certified: Data Analyst Associate – Analytics Benchmark

Deloitte Australia – Data Analytics Job Simulation (Forage)

Tata – GenAI Powered Data Analytics Job Simulation (Forage)

EDUCATION

Bachelor's Degree in Business/Commerce with Computer Applications

2021 – 2024

Veda Degree College, Hyderabad
